**CORONA VIRUS/COVID-19
ALL SUPPORT FUNCTIONS AT PICHON ARE STILL UP AND RUNNING.**

At PICHON we also take the current situation with corona virus/COVID-19 very seriously. We follow the instructions of the national health authorities unconditionally and adapt continuously.

To our customers, suppliers and other partners, we would like to emphasize that all support functions at PICHON are in full swing.

ADMINISTRATION & SALES

Employees both at home and abroad can be contacted on both e-mail and telephone as usual. Employees who have the opportunity, work from home.

PARTS & SERVICE

It is high season for the use of slurry tankers and muck spreaders – Therefore we do our utmost to enable you to continue your activities. Technical service for our dealers is done by mail and telephone. Orders for spare parts are dispatched according to local transport and freight authorisations.

PRODUCTION

The factory in Landivisiau continues its production. Of course, taking into account current hygiene instructions and social distancing. However, we are dependent on our supply chains. If these were to come to a halt, we would be forced to review our organisation.

Thank you for your understanding.

The Management
